Overview of the Week-1 Lecture At

Introduction to the Week-1 Lecture

Welcome to Week 1: You will be provided with a variety of resources both here, in Canvas, and to be used in your tutorial sessions, to help explore this topic; including a recorded lecture to introduce concepts, readings from your set text, and then a self-test quiz.

What we will learn

This lecture is mostly about introduction of security and computing and some discussion about course outline, assignments etc. As introduction, in this lecture we will see the historical perspective of Cryptography, some basic and easy cryptanalysis such as Caesar Cipher, Double Transposition and Codebook Cipher etc.

Purpose

By completing the lecture, followed by tutorials and self-reflection tests (will be available at the end of the week) to ensure you have understood the key concepts, you will be able to begin work on Assignment 1.
